**Culture and Values: A Survey of the Humanities, Volume I** Jan 10 2021 The ninth edition of CULTURE AND VALUES: A SURVEY OF THE HUMANITIES introduces students to the history of humankind through the lens of the humanities -- language and literature, art and architecture, music, philosophy, and religion -- from the dawn of civilization to the contemporary world. CULTURE AND VALUES encourages students to place their own backgrounds and beliefs in context and consider how understanding both their own and other heritages contributes to becoming a citizen of the world in the 21st century. Coauthor Lois Fichner-Rathus continues to bring her pedagogical expertise, clear conversational style, and love of teaching to this beautifully written and illustrated book. New and revised features encourage students to draw comparisons and connections as well as engage their critical thinking skills. Chapter previews, timelines, glossaries, and "Big Picture" reviews provide consistent pedagogical support throughout the text to help students master the material. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

**The Western Humanities, Complete** Dec 29 2019 Chronologically organized, The Western Humanities presents the cultural achievements of western civilization--art and architecture, music, history, literature, philosophy, theater, film and the other arts--within their historical context. By examining the historical and material conditions that influenced the form and content of the arts and humanities, the authors provide

students with a clear framework, a deeper understanding of the meaning of cultural works, and a broader basis for analyzing and appreciating the cultural achievements of the West. Hundreds of illustrations bring the arts and humanities to life, while extensive pedagogy consistently asks students to think about, interpret, and apply the information throughout the text and at the end of each chapter.

**Experience Humanities, Complete** Oct 31 2022 The humanities are alive. We see the great pyramids in contemporary design; we hear Bach in hip-hop and pop music; and we feel ancient religious themes and philosophies in our impassioned contemporary dialogues. Experience Humanities invites students to take note of the continual evolution of ideas and cross-cultural influences, to better understand their cultural heritage and to think critically about what their legacy will be for future generations. Together with Connect™ Humanities, students not only experience their cultural heritage, but develop crucial critical thinking, reading, and writing skills, preparing them to succeed in their humanities course and beyond.

Humanities Through the Arts Jan 22 2022 "The Humanities through the Arts, tenth edition, explores the humanities with an emphasis on the arts. Examining the relationship of the humanities to values, objects, and events important to people is central to this book. We make a distinction between artists and other humanists: Artists reveal values, while other humanists examine or reflect on values. We study how values are revealed in the arts while keeping in mind a basic question: "What is art?" Judging by the existence of ancient artifacts, we see that artistic expression is one of the most fundamental human activities. It binds us together as a people by revealing the most important values of our culture"--

**How to Design and Evaluate Research in Education** Aug 05 2020 **How to Design and Evaluate Research in Education** provides a comprehensive introduction to educational research. Step-by-step analysis of real research studies provides students with practical examples of how to prepare their work and read that of others. End-of-chapter problem sheets, comprehensive coverage of data analysis, and information on how to prepare research proposals and reports make it appropriate both for courses that focus on doing research and for those that stress how to read and understand research.

**Handbook of the Psychology of Aging** Feb 29 2020 **The Handbook of the Psychology of Aging, Seventh Edition**, provides a basic reference source on the behavioral processes of aging for researchers, graduate students, and professionals. It also provides perspectives on the behavioral science of aging for researchers and professionals from other disciplines. The book is organized into four parts. Part 1 reviews key methodological and analytical issues in aging research. It examines some of the major historical influences that might provide explanatory mechanisms for a better understanding of cohort and period differences in psychological aging processes. Part 2 includes chapters that discuss the basics and nuances of executive function; the history of the morphometric research on normal brain aging; and the neural changes that occur in the brain with aging. Part 3 deals with the social and health aspects of aging. It covers the beliefs that individuals have about how much they can control various outcomes in their life; the impact of stress on health and aging; and the interrelationships between health disparities, social class, and aging. Part 4 discusses the emotional aspects of aging; family caregiving; and mental disorders and legal capacities in older adults. Contains all the main areas of psychological gerontological research in one volume Entire section on neuroscience and aging Begins with a section on theory and methods Edited by one of the father of gerontology (Schaie) and contributors represent top scholars in gerontology

**The Art of Being Human** Jul 04 2020 **The Art of Being Human, Eighth Edition**, introduces students to the ways in which the humanities can broaden their perspectives, enhance their ability to think critically, and enrich their lives. Ideal for the one-semester humanities course, this well-respected book has been lauded for its scope, accessibility, and writing style. Featuring a unique topical organization, Part I examines ways of responding to the humanities, their mythic origins, and important struggles in the arts. Part II explores the individual genres of literature, art, music, theater, song and dance, and cinema. Part III looks at provocative themes in the humanities: religion, morality, happiness, love, life and death, and freedom

**A New Deal for the Humanities** Jul 16 2021 Many in higher education fear that the humanities are facing a crisis. But even if the rhetoric about "crisis" is overblown, humanities departments do face increasing pressure from administrators, politicians, parents, and students. In *A New Deal for the Humanities*, Gordon Hutner and Feisal G. Mohamed bring together twelve prominent scholars who address the history, the present state, and the future direction of the humanities. These scholars keep the focus on public higher education, for it is in our state schools that the liberal arts are taught to the greatest numbers and where their neglect would be most damaging for the nation. The contributors offer spirited and thought-provoking debates on a diverse range of topics. For instance, they deplore the push by administrations to narrow learning into quantifiable outcomes as well as the demands of state governments for more practical, usable training. Indeed, for those who suggest that a college education should be "practical"—that it should lean toward the sciences and

engineering, where the high-paying jobs are—this book points out that while a few nations produce as many technicians as the United States does, America is still renowned worldwide for its innovation and creativity, skills taught most effectively in the humanities. Most importantly, the essays in this collection examine ways to make the humanities even more effective, such as offering a broader array of options than the traditional major/minor scheme, options that combine a student's professional and intellectual interests, like the new medical humanities programs. A democracy can only be as energetic as the minds of its citizens, and the questions fundamental to the humanities are also fundamental to a thoughtful life. A New Deal for the Humanities takes an intrepid step in making the humanities—and our citizens—even stronger in the future.

Nuclear Medicine and PET/CT - E-Book May 02 2020 A comprehensive guide to procedures and technologies, *Nuclear Medicine and PET/CT: Technology and Techniques* provides a single source for state-of-the-art information on all aspects of nuclear medicine. Coverage includes relevant anatomy and physiology and discusses each procedure in relation to the specific use of radiopharmaceuticals and the instruments required. Edited by experts in nuclear imaging and PET/CT, Paul E. Christian and Kristen M. Waterstram-Rich, this edition has a new chapter on MRI as it relates to nuclear medicine and includes practical, step-by-step instructions for procedures. PET/CT focus with hybrid PET/CT studies in several chapters provides cutting-edge information that is especially beneficial to working technologists. CT Physics and Instrumentation chapter introduces CT as it is applied to PET imaging for combined PET/CT studies. Authoritative, comprehensive resource conveys state-of-the-art information, eliminating the need to search for information in other sources. Foundation chapters cover basic math, statistics, physics, instrumentation, computers, lab science, radiochemistry, and pharmacology, allowing you to understand how and why procedures are performed. Accessible writing style and approach to basic science subjects simplifies topics, progressing from fundamentals to more complex concepts. More than 50 practice problems in the math and statistics chapter let you brush up on basic math skills, with answers provided in the back of the book. Key terms, chapter outlines, learning objectives, and suggested readings help you organize your study. A table of radionuclides used in nuclear medicine and PET is provided in the appendix for quick reference. A glossary provides definitions of key terms and important concepts. High-profile editors and contributors come from a variety of educational and clinical settings, providing a broad philosophic and geographic perspective. New MRI Physics, Instrumentation and Clinical Introduction chapter provides important background on MRI and its relationship with nuclear medicine. Procedures boxes in body systems chapters provide step-by-step descriptions of clinical procedures. Updates and revisions keep you current with the latest advances. Expanded 16-page color insert includes more diagnostic images demonstrating realistic scans found in practice.

**Hands on Media History** Nov 19 2021 Hands on Media History explores the whole range of hands on media history techniques for the first time, offering both practical guides and general perspectives. It covers both analogue and digital media; film, television, video, gaming, photography and recorded sound. Understanding media means understanding the technologies involved. The hands on history approach can open our minds to new perceptions of how media technologies work and how we work with them. Essays in this collection explore the difficult questions of reconstruction and historical memory, and the issues of equipment degradation and loss. Hands on Media History is concerned with both the professional and the amateur, the producers and the users, providing a new perspective on one of the modern era's most urgent questions: what is the relationship between people and the technologies they use every day? Engaging and enlightening, this collection is a key reference for students and scholars of media studies, digital humanities, and for those interested in models of museum and research practice.

**Teaching Humanities & Social Sciences** Jun 14 2021 Teaching Humanities and Social Sciences, 7e prepares teachers to develop and implement programs in the humanities and social sciences learning area from F-10. It successfully blends theory with practical approaches to provide a basis for teaching that is engaging, inquiry-based and relevant to students' lives. Using Version 8.1 of the Australian Curriculum, the text discusses the new structure of the humanities and social sciences learning area. Chapters on history, geography, civics and citizenship, and economics and business discuss the nature of these subjects and how to teach them to achieve the greatest benefit for students, both as sub-strands within the Year F-6/7 HASS subject and as distinct Year 7-10 subjects. Throughout, the book maintains its highly respected philosophical and practical orientation, including a commitment to deep learning in a context of critical inquiry. With the aid of this valuable text, teachers can assist primary, middle and secondary students to become active and informed citizens who contribute to a just, democratic and sustainable future.
