**Knowledge, Reality, and Value** Aug 08 2020 The world's best introduction to philosophy, Knowledge, Reality, and Value explains basic philosophical problems in epistemology, metaphysics, and ethics, such as: How can we know about the world outside our minds? Is there a God? Do we have free will? Are there objective values? What distinguishes morally right from morally wrong actions? The text succinctly explains the most important theories and arguments about these things, and it does so a lot less boringly than most books written by professors. "My work is all a series of footnotes to Mike Huemer." -Plato "This book is way better than my lecture notes." -Aristotle "When I have a little money, I buy Mike Huemer's books; and if I have any left, I buy food and clothes." -Erasmus Contents Preface Part I: Preliminaries 1. **Madmen, Intellectuals, and Academic Scribblers** Dec 12 2020 Madmen, Intellectuals, and Academic Scribblers presents a simple, economic framework for understanding the systematic causes of political change. Wayne A. Leighton and Edward J. López take up three interrelated questions: Why do democracies generate policies that impose net costs on society? Why do such policies persist over long periods of time, even if they are known to be socially wasteful and better alternatives exist? And, why do certain wasteful policies eventually get repealed, while others endure? The authors examine these questions through familiar policies in contemporary American politics, but also draw on examples from around the world and throughout history. Assuming that incentives drive people's decisions, the book matches up three key ingredients—ideas, rules, and incentives—with the characters who make political waves: madmen in authority (such as Franklin Delano Roosevelt and Margaret Thatcher), intellectuals (like Jon Stewart and George Will), and academic scribblers (in the vein of Friedrich Hayek

and John Maynard Keynes). Political change happens when these characters notice holes in the structure of ideas, institutions, and incentives, and then act as entrepreneurs to shake up the status quo.

Delusions; An Analysis of the Book of Mormon Nov 10 2020 Excerpt from *Delusions; An Analysis of the Book of Mormon: With an Examination of Its Internal and External Evidences, and a Refutation of Its Pretences to Divine Authority* Its external evidences are also the subscriptions of four Whitmers, three Smiths; and one Page, the relatives and connexions of Joseph Smith, junior. And these 'men handled as many of the brazen or golden leaves as the said Smith translated.' So did I. But Smith has got the plates of which hath been spoken. Let him show them. Their certificate proves nothing, save that Smith wrote it, and they signed it. But Smith gives testimony himself. There is one who says, 'if I bear testimony of myself, my testimony ought not to be regarded.' About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. **Skepticism and the Veil of Perception** Mar 15 2021 Since Descartes, one of the central questions of Western philosophy has been that of how we know that the objects we seem to perceive are real. Philosophical skeptics claim that we know no such thing. Representationalists claim that we can gain such knowledge only by inference, by showing that the hypothesis of a real world is the best explanation for the kind of sensations and mental images we experience. Both accept the doctrine of a 'veil of perception: ' that perception can only give us direct awareness of images or representations of objects, not the external objects themselves. In contrast, Huemer develops a theory of perceptual awareness in which perception gives us direct awareness of real objects, not mental representations, and we have non-inferential knowledge of the properties of these objects. Further, Huemer confronts the four main arguments for philosophical skepticism, showing that they are powerless against this kind of theory of perceptual knowledge

**The Rise of the Public Authority** Mar 03 2020 In the late nineteenth century, public officials throughout the United States began to experiment with new methods of managing their local economies and meeting the infrastructure needs of a newly urban, industrial nation. Stymied by legal and financial barriers, they created a new class of quasi-public agencies called public authorities. Today these entities operate at all levels of government, and range from tiny operations like the Springfield Parking Authority in Massachusetts, which runs thirteen parking lots and garages, to mammoth enterprises like the Tennessee Valley Authority, with nearly twelve billion dollars in revenues each year. In *The Rise of the Public Authority*, Gail Radford recounts the history of these inscrutable agencies, examining how and why they were established, the varied forms they have taken, and how these pervasive but elusive mechanisms have molded our economy and politics over the past hundred years.

Literary Authority and the Modern Chinese Writer Jan 01 2020 Throughout the twentieth century, Chinese writers have confronted the problem of creating a new literary tradition that both maintains the culturally unique aspects of a rich heritage and succeeds in promoting a new modernity. In the first book-length treatment of the topic, Wendy Larson examines the contradictory forms of authority at work in the autobiographical texts of modern Chinese writers and scholars and the way these conflicts helped to shape and determine the manner in which writers viewed themselves, their texts, and their work. Larson focuses on the most famous writers associated with the May Fourth Movement, a group most active in the 1920s and 1930s, and their fundamental ambivalence about writing. She analyzes how their writing paradoxically characterized textual labor as passive, negative, and inferior to material labor and the more physical political work of social progress, and she describes the ways they used textual means to devalue literary labor. The impact of China's increasing contact with the West—particularly the ways in which Western notions of “individualism” and “democracy” influenced Chinese ideologies of self and work—is considered. Larson also studies the changes in China's social structure, notably those linked to the abolition in 1905 of the educational exam system, which subsequently broke the link between the mastery of certain texts and the attainment of political power, further denigrating the cultural role of the writer.
