[Aristotle](#) Sep 29 2019 The Aristotle Collection of the University of Pennsylvania Library owes its existence to Dr. Charles W. Burr, Professor in the University's Medical School and generous donor to the library. His gifts of books over a long period of years included any valuable Aristotle items and in 1932 he presented his own library to the University. A bequest at his death in 1944 established a fund which has enabled the library to purchase a number of important additions to the collection. These books and manuscripts are a rich source for those interested in medieval and Renaissance scholarship. The very number of the early printed editions in this catalogue—over five hundred—attests to the importance that was attached to the study of Aristotle during the fifteenth, sixteenth, and even the seventeenth centuries. Medieval Latin translations of the texts of Aristotle continued to appear during the Renaissance. The twelfth-century translations of Guilelmus of Moerbeke can be noted in this catalogue as

late as 1589; even when a contemporary translation was available and was used, it was not uncommon for the earlier version to be printed with it. The list of commentators, translators, and editors of the Aristotelian tradition includes the names of many well-known humanists from all over the continent. These men, protagonists of the new learning, nevertheless concerned themselves with that same philosopher who so dominated the teachings of the medieval schools. Another indication of the Aristotelian influence is the great number of translations of his works into the vernacular. The German, Italian, and French versions in this collection, as well as in others, attest to the wide interest in his works in Europe. Few aspect of medieval and Renaissance civilization were free from the influence of "The Philosopher" and this work is therefore a valuable adjunct to any study of the period. The collection, seemingly so strictly limited to one great figure, will prove useful in a great variety of scholarly pursuits.

Public Life in Renaissance Florence Jun 06 2020 Covering the history of Renaissance Florence from the

fourteenth century to the beginnings of the Medici duchy, Richard C. Trexler traces collective ritual behavior in all its forms, from a simple greeting to the most elaborate community festival. He examines three kinds of social relationships: those between individual Florentines, those between Florentines and foreigners, and those between Florentines and God and His saints. He maintains that ritual brought life to the public world and, when necessary, reformed public life.

Camera Technology Jul 28 2019 For anyone who has ever wondered how cameras work, this book is a pleasant way to learn. It is generously endowed with enough fundamentals to satisfy the technical specialist, without intimidating the casual but curious amateur photographer. The author has repaired, modified, and designed and analyzed cameras for the past forty five years. With this background, he goes beyond describing camera functions based on advertised data, instead the book explains how various cameras really work. The book peels off the cover panels and lets you look into the dark side of the lens. The dozen or so formulas use simple math and the drawings alone are worth the price of admission. Describes how cameras work and how well they overcome the difficulties in making a technically perfect photo Covers causes of image faults Presents unique methods for testing cameras Covers integration of optics, electronics, and mechanics in contemporary cameras

Classical Traditions in Science Fiction Jun 18 2021 For all its concern with change in the present and future, science fiction is deeply rooted in the past and, surprisingly, engages especially deeply with the ancient world. Indeed, both as an area in which the meaning of "classics" is actively transformed and as an open-ended set of texts whose own 'classic' status is a matter of ongoing debate, science fiction reveals much about the roles played by ancient classics in modern times. Classical Traditions in Science Fiction is the first collection in English dedicated to the study of science fiction as a site of classical receptions, offering a much-needed mapping of that important cultural and intellectual terrain. This volume discusses a wide variety of representative examples from both classical antiquity and the past four hundred years of science fiction, beginning with science fiction's "rosy-fingered dawn" and moving toward the other-worldly literature of the present day. As it makes its way through the eras of science fiction, Classical Traditions in Science Fiction exposes the many levels on which science fiction engages the ideas of the ancient world, from minute matters of language and structure to the larger thematic and philosophical concerns.

The History of the Diadochoi in Book XIX of Diodoros' »Bibliothek«

Mar 04 2020 Diodoros of Sicily's

book XIX is the main source for the history of the Diadochoi, Alexander the Great's Successors, from 317 to 311 BCE. With the first full-scale commentary on this text in any language Alexander Meeus offers a detailed and reliable guide to the complicated historical narrative and the fascinating ethnographic information transmitted by Diodoros, which includes the earliest accounts of Indian widow burning and Nabataean culture. Studying both history and historiography, this volume elucidates a crucial stage in

the creation of the Hellenistic world in Greece and the Near East as well as the confusing source tradition. Diodoros, a long neglected author indispensable for much of our knowledge of Antiquity, is currently enjoying growing scholarly interest. An ample introduction discusses his historical methods and sheds light on his language and style and on the manuscript transmission of books XVII-XX. By negotiating between diametrically opposed scholarly opinions a new understanding of Diodoros' place in the ancient historiographical tradition is offered. The volume is of interest to scholars of ancient historiography, Hellenistic history, Hellenistic prose and the textual transmission of the Bibliothek.
