**The SAGE Handbook of Online Research Methods** Jul 08 2020 This handbook is the first to provide comprehensive, up-to-the-minute coverage of contemporary and developing Internet and online social research methods, spanning both quantitative and qualitative research applications. The editors have brought together leading names in the field of online research to give a thoroughly up to date, practical coverage, richly illustrated with examples. The chapters cover both methodological and procedural themes, offering readers a sophisticated treatment of the practice and uses of Internet and online research that is grounded in the principles of research methodology. Beginning with an examination of the significance of the Internet as a research medium, the book goes on to cover research design, data capture, online surveys, virtual ethnography, and the internet as an archival resource, and concludes by looking at potential directions for the future of Internet and online research. The SAGE Handbook of Internet and Online Research Methods will be welcomed by anyone interested in the contemporary practice of computer-mediated research and scholarship. Postgraduates, researchers and methodologists from disciplines across the social sciences will find this an invaluable source of reference.

*Handbook of Research on Food Processing and Preservation Technologies* Aug 28 2019 The Handbook of Research on Food Processing and Preservation Technologies is a valuable 5-volume collection that illustrates various design, development, and applications of novel and innovative strategies for food processing and preservation. The roles and applications of minimal processing techniques (such as ozone treatment, vacuum drying, osmotic dehydration, dense phase carbon dioxide treatment, pulsed electric field, and high-pressure assisted freezing) are discussed, along with a wide range of applications. The handbook also explores some exciting computer-aided techniques emerging in the food processing sector, such as robotics, radio frequency identification (RFID), three-dimensional food printing, artificial intelligence, etc. Some emphasis has also been given on nondestructive quality evaluation techniques (such as image processing, terahertz spectroscopy imaging technique, near infrared, Fourier transform infrared spectroscopy technique, etc.) for food quality and safety evaluation. The significant roles of food properties in the design of specific foods and edible films have been elucidated as well. Volume 4: Design and Development of Specific Foods, Packaging Systems, and Food Safety presents new research on health food formulation, advanced packaging systems, and toxicological studies for food safety. This volume covers in detail the design of functional foods for beneficial gut microflora, design of specific foods for gut microbiota, composite probiotic dairy products: concepts and design with a focus on millets, encapsulation technology for development of specific foods, prospects of edible and alternative food packaging technologies, recent advancements in edible and biodegradable materials for food packaging, potential of ozonation in surface modification of food packaging polymers, characterization applications and safety aspects of nanomaterials used in food and dairy industry, toxic effects of tinplate corrosion, and mitigation measures in canned foods. Other volumes in the set include: Volume 1: Nonthermal and Innovative Food Processing Methods Volume 2: Nonthermal Food Preservation and Novel Processing Strategies Volume 3: Computer-Aided Food Processing and Quality Evaluation Techniques Volume 5: Emerging Techniques for Food Processing, Quality, and Safety Assurance The book helps to provide an understanding of different food formulations and development of edible packaging techniques with emphasis on the assessment of food product safety and quality. The book also provides information on various methods of formulation for development of new and safe products. Together with the other volumes in the set, Handbook of Research on Food Processing and Preservation Technologies will be a valuable resource for researchers, scientists, students, growers, traders, processors, industries, and others.

Allen's Indian Mail and Register of Intelligence for British & Foreign India, China, & All Parts of the East Jul 28 2019

Music by Numbers May 06 2020 The music industries are fuelled by statistics: sales targets, breakeven points, success ratios, royalty splits, website hits, ticket revenues, listener figures, piracy abuses and big data. Statistics are of consequence. They influence the music that consumers get to hear, they determine the revenues of music makers, and they shape the policies of governments and legislators. Yet many of these statistics are generated by the music industries themselves, and their accuracy can be questioned. This original new book sets out to explore this shadowy terrain. While there are books that offer guidelines about how the music industries work, as well as critiques from academics about the policies of music companies, this is the first book that takes a sustained look at these subjects from a statistical angle. This is particularly significant as statistics have not just been used to explain the music industries, they are also essential to the ways that the industries work: they drive signing policy, contractual policy, copyright policy, economic policy and understandings of consumer behaviour. This edited collection provides the first in-depth examination of the use and abuse of statistics in the music industries. The international group of contributors are noted music business scholars and practitioners in the field. The book addresses five key areas in which numbers are employed: sales and awards; royalties and distribution; music piracy; music policy; and

audiences and their uses of music. The authors address these subjects from a range of perspectives. Some of them test the veracity of this data and explore its tactical use by music businesses. Others are helping to generate these numbers: they are developing surveys and online projects and offer candid self-observations in this volume. There are also authors who have been subject to statistics; they deliver first-hand accounts of music industry reporting. The digital age is inherently numerical. Within the music industries this has prompted new ways of tracking the usage and recompense of music. In addition, it has generated new means of monitoring and engaging audience behaviour. It has also led to increased documentation of the trade. There is more reporting of the overall revenues of music industry sectors. There is also more engagement between industry and academia when it comes to conducting analyses and offering numerical recommendations to politicians. The aim of this collection is to expose the culture and politics of data. Music industry statistics are all-pervasive, yet because of this ubiquity they have been under-explored. This book provides new ways by which to learn music by numbers. A timely examination of how data and statistics are key to the music industries. Widely held industry assumptions are challenged with data from a variety of sources and in an engaging, lucid manner. Highly recommended for anyone with an interest in how the music business uses and manipulates the data that digital technologies have made available. Primary readership will be among popular music academics, undergraduate and postgraduate students working in the fields of popular music studies, music business, media studies, cultural studies, sociology and creative industries. The book will also be of interest to people working within the music industries and to those whose work encounters industry statistics.

*The Negro Motorist Green Book* May 30 2022 The idea of "The Green Book" is to give the Motorist and Tourist a Guide not only of the Hotels and Tourist Homes in all of the large cities, but other classifications that will be found useful wherever he may be. Also facts and information that the Negro Motorist can use and depend upon. There are thousands of places that the public doesn't know about and aren't listed. Perhaps you know of some? If so send in their names and addresses and the kind of business, so that we might pass it along to the rest of your fellow Motorists. You will find it handy on your travels, whether at home or in some other state, and is up to date. Each year we are compiling new lists as some of these places move, or go out of business and new business places are started giving added employment to members of our race.

*Ecology and Socialism (Large Print 16pt)* Jun 30 2022 Around the world' consciousness of the threat to our environment is growing. The majority of solutions on offer' from using efficient light bulbs to biking to work' focus on individual lifestyle changes' yet the scale of the crisis requires far deeper adjustments. Ecology and Socialism argues that time still remains to save humanity and the planet' but only by building social movements for environmental justice that can demand qualitative changes in our economy' workplaces' and infrastructure.

**Travellers from Europe in the Ottoman and Safavid Empires, 16th-17th Centuries** Oct 03

2022 This collection of Sonja Brentjes's articles deals with travels, encounters and the exchange of knowledge in the Mediterranean and Western Asia during the 16th and 17th centuries, focusing on three historiographical concerns. The first is how we should understand the relationship between Christian and Muslim societies, in the period between the translations from Arabic into Latin (10th - 13th centuries) and before the Napoleonic invasion of Ottoman Egypt (1798). The second concern is the "Western" discourse about the decline or even disappearance of the sciences in late medieval and early modern Islamic societies and, third, the construction of Western Asian natures and cultures in Catholic and Protestant books, maps and pictures. The articles discuss institutional and personal relationships, describe how Catholic or Protestant travellers learned about and accessed Muslim scholarly literature, and uncover contradictory modes of reporting, evaluating or eradicating the visited cultures and their knowledge.

**Chapters from My Autobiography** Jan 14 2021 Renowned American humorist Mark Twain turns his incisive wit loose on his own life story in this unique take on the nineteenth-century memoir. Originally composed in a format that studiously ignored the careful chronological structure that most autobiographies follow, these essays were first published in book form ten years after the author's death. Twain fans will love the author's account of his quintessentially American upbringing, wildly zig-zagging career path, and gradual transition into the writing life.

**How Music Got Free** Mar 28 2022 Soon to be an Apple TV+ documentary series One of Billboard's 100 Greatest Music Books of All Time Finalist for the Los Angeles Times Book Prize, the J. Anthony Lukas Book Prize, and the Financial Times and McKinsey Business Book of the Year A New York Times Editors' Choice ONE OF THE YEAR'S BEST BOOKS: The Washington Post • The Financial Times • Slate • The Atlantic • Time • Forbes "[How Music Got Free] has the clear writing and brisk reportorial acumen of a Michael Lewis book."—Dwight Garner, The New York Times What happens when an entire generation commits the same crime? How Music Got Free is a riveting story of

obsession, music, crime, and money, featuring visionaries and criminals, moguls and tech-savvy teenagers. It's about the greatest pirate in history, the most powerful executive in the music business, a revolutionary invention and an illegal website four times the size of the iTunes Music Store. Journalist Stephen Witt traces the secret history of digital music piracy, from the German audio engineers who invented the mp3, to a North Carolina compact-disc manufacturing plant where factory worker Dell Glover leaked nearly two thousand albums over the course of a decade, to the high-rises of midtown Manhattan where music executive Doug Morris cornered the global market on rap, and, finally, into the darkest recesses of the Internet. Through these interwoven narratives, Witt has written a thrilling book that depicts the moment in history when ordinary life became forever entwined with the world online—when, suddenly, all the music ever recorded was available for free. In the page-turning tradition of writers like Michael Lewis and Lawrence Wright, Witt's deeply reported first book introduces the unforgettable characters—inventors, executives, factory workers, and smugglers—who revolutionized an entire artform, and reveals for the first time the secret underworld of media pirates that transformed our digital lives. An irresistible never-before-told story of greed, cunning, genius, and deceit, *How Music Got Free* isn't just a story of the music industry—it's a must-read history of the Internet itself.

**Cyber Society, Big Data, and Evaluation** Feb 24 2022 We are living in a cyber society. Mobile devices, social media, the Internet, crime cameras, and other diverse sources can be pulled together to form massive datasets, known as big data, which make it possible to learn things we could not begin to comprehend otherwise. While private companies are using this macroscopic tool, policy-makers and evaluators have been slower to adopt big data to make and evaluate public policy. *Cyber Society, Big Data, and Evaluation* shows ways big data is now being used in policy evaluation and discusses how it will transform the role of evaluators in the future. Arguing that big data will play a permanent and growing role in policy evaluation, especially since results may be delivered almost in real time, the contributors declare that the evaluation community must rise to the challenge or risk being marginalized. This volume suggests that evaluators must redefine their tools in relation to big data, obtain competencies necessary to work with it, and collaborate with professionals already experienced in using big data. By adding evaluators' expertise, for example, in theory-driven evaluation, using repositories, making value judgements, and applying findings, policy-makers and evaluators can come to make better-informed decisions and policies.

Heads of Families at the First Census of the United States Taken in the Year 1790 ... Aug 01 2022

**Sixteen Years in Chile and Peru** Dec 13 2020

Cyber Crime, Regulation and Security: Contemporary Issues and Challenges Apr 04 2020 In the era of a fast-changing technically driven society, to make life easy and simple people use various devices. The Internet is one of the easiest and most economical modes of connecting people and businesses across the world. Usually, it is believed that a computer has been used as a medium or instrument for the commission of cybercrimes like trespass, larceny, or conspiracy on the other hand much credence is given to the unique nature of emerging technologies and unique set of challenges, unknown to the existing cyber jurisprudence, such as nature and scope of cybercrimes, intention, and difficulties in locating the offender, jurisdiction and its enforcement. Cyber Crimes are risky for different organizations and people networking on the internet. It poses a great challenge and threat for individuals as well as for society. The objective of the National Conference on Cyber Crime Security and Regulations - 2022 was to examine the emerging cybercrime security and regulation issues and trends in the current scenario. This conference was multidisciplinary in nature and dealt with debatable and relevant issues that the world is facing in cyberspace in the current scenario. This conference provided a platform to legal professionals, academic researchers and consultants an opportunity to share their experiences and ideas through panel discussion and paper presentations across the country and witnessed nearly 150 participations.
